Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

1. Claims 5-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Porzio et al in view of Fulger et al for the same reason set forth in paragraph 5 of the previous office action.
2. In the response filed Sept. 18, 2002, applicant argues the two references do not teach all of the claimed limitations, specifically neither reference teaches treating the particles with an inert gas at a gas velocity of .2 to 4 m/s. This argument is found to be persuasive with respect to the process claims. For this reason, the allowance of the process claims was suggested to applicant in a telephone interview; however, applicant had declined such suggestion. With respect to the product claims, the limitation on the gas velocity is a difference in the processing step and applicant has not shown that such difference leads to a different product. Fulger teaches to cool the encapsulated particles using ambient air; thus, it would have been obvious to one skilled in the art to use the Fulger's teaching to cool the Porzio et al particles. The treating of the particles with inert gas in the claimed product is also for cooling the particles. Whether the air is static or moving does not make the product to be different because the end product of both processes are cooled encapsulated particles.
3. Applicant's arguments filed Sept. 18, 2002 have been fully considered but they are not persuasive.
4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1761

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
